PROJECTS

NGRREC GREON Data Visualization - Senior Project 9 months

- Provided NGRREC reliable access to data from their water quality buoys, alongside teammates
- Built a website and migrated to a database, using React, Next.js, PostgreSQL, and other tools
- <https://greon.ngrrc.org/> (site is sadly broken currently; current students are making upgrades)

DNA Accessibility Deep Learning Project - Undergraduate Showcase 4 months

- Utilized neural networks to locate accessible regions in T-cells and lymphoblasts
- Used PyTorch, Conda, and bedtools
- https://bit.ly/T_Cell_Lymphoblast_Accessibility

SerffScape 1 month

- Retrieves publicly available SERFF insurance filings using Selenium and Python
- Parses resulting PDFs into Excel spreadsheets for further analysis
- Collaboration with a friend who wanted a way to automate part of his workflow
- <https://github.com/cbayles1/Serff-Scrape>

Music Stand 7 months

- Constructed a React/Express.js app that provides links to sheet music and chord charts
- Allows users to add, remove, and modify song entries to and from the list
- Allows for searching, sorting and filtering by author, title, key, date added, or custom tag
- <https://github.com/cbayles1/musicStand>
